

Your institutional data tells you what happened.

What tells you what people are **starting to think**?

EMBI-Gov helps Virginia institutions continuously monitor human-sourced public signals around the issues they care about — establishing a baseline, detecting change over time, and producing analyst-ready interpretation.

QUESTIONS VIRGINIA INSTITUTIONS ARE ASKING

What barriers are adult learners discussing?

How is the perceived value of higher education changing?

What concerns are emerging around AI and education?

What are employers saying about workforce skills and program needs?

How are prospective students talking about affordability, programs, and career outcomes?

Which issues are rising before they become obvious in institutional metrics?

BUILT FOR INSTITUTIONAL RESEARCH AND PLANNING

- ✓ Persistent monitoring — not a one-time survey or snapshot
- ✓ Human-sourced signals — grounded in publicly available discourse
- ✓ No integration required — private browser-based workspace
- ✓ Historical trend visibility — see how issues evolve
- ✓ Quarterly synthesis — leadership-ready interpretation
