

EMBI-GovSM

Persistent Human-Sourced Intelligence for Institutional Effectiveness

SUPPORTING ENVIRONMENTAL SCANNING FOR ASSESSMENT, ACCREDITATION & INSTITUTIONAL RESEARCH

Crisis Logic, LLC

Statewide service area • Founded 2017 • Northern Virginia

Environmental Scanning, Made Continuous

- Persistent monitoring of public discourse on a topic your office defines
- Baseline establishment with Global DriftSM change detection
- Historical visualization of movement over time
- Quarterly or monthly analyst-ready reporting — not a one-time snapshot

EMBI-GOV-BASE

from \$9,500 / yr

- One agency-defined monitored topic, private MFA-secured workspace
- Baseline, drift detection, visualization, quarterly reporting included

Add a Monitored Topic

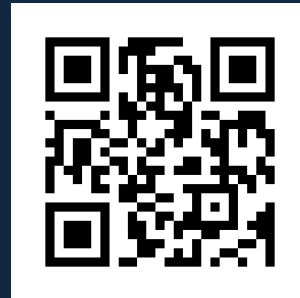

from \$3,000 / topic

- Expand an active workspace as your scanning needs grow
- Co-terminous with base subscription; up to 3 topics per add-on tier

Why Not a General AI Assistant?

- General AI answers individual prompts; EMBI-Gov maintains a persistent, agency-defined monitoring requirement over time
- Preserves history and detects drift automatically — no re-creating the research each cycle
- No integration or IT onboarding required to begin
